Photography & imagery

Use natural light, tactile detail, and real environments when they support the story. Portraits and treatment shots should read as **relaxed, peaceful, calm, and happy**—never rushed, cold, or overly posed. Rounded corners and a light frame match the site.

Dark accents and counter balance

Let warm cream carry most of the story, then use **charcoal** as a deliberate counter balance for emphasis: testimonials, pricing, booking, and key CTAs. Pair charcoal with **cream type** and **gold** accents so the dark reads premium, not flat. A very soft, blurred gold glow behind content (low opacity) keeps the accent warm rather than loud.
